## **Rules for Training of military medicine specialists of the Armed Forces of the Republic of Kazakhstan**

Footnote. The Rules as amended by the order of the Minister of Defense of the Republic of Kazakhstan dated 19.07.2024 №749 (shall be enforced upon expiry of ten calendar days after the date of its first official publication).

### **Chapter 1. General provisions**

1. These Rules for Training of military medicine specialists of the Armed Forces of the Republic of Kazakhstan (hereinafter – the Rules) determine the procedure for Training of military medicine specialists of the Armed Forces of the Republic of Kazakhstan.

2. The following definitions are used in these Rules:

1) medical officer - resident – A serviceperson studying in a residency educational program under the supervision of a mentor from a medical organization;

2) military internship – a form of training of servicepersons in clinical specialties within the framework of basic higher medical education to obtain admission to clinical practice, carried out by a structural subdivision of a higher military educational institution;

3) military intern - a serviceperson studying in a military internship;

4) military medical faculty – structural subdivision of a higher military educational institution which subordinates to the Ministry of Defense of the Republic of Kazakhstan, designed for training medical specialists within the framework of basic higher and (or) postgraduate medical education;

5) PhD student – a serviceperson studying in a PhD program;

6) master's student – a serviceperson studying in a master's degree program;

7) residency educational program base – hospital of a health education organization, university hospital, national center, scientific center or research institute accredited as a medical organization, on the basis of which residency programs are implemented in accordance with the procedure established by the authorized body in the field of health care;

8) mentor – A medical worker with at least five years of experience, appointed by the head of a medical organization or medical education organization to provide practical assistance in the professional adaptation of students in medical education programs and young specialists, operating on the basis of the trinity of education, science and practice.

3. In accordance with these Rules, training of military medicine specialists of the Armed Forces of the Republic of Kazakhstan shall be carried out:

1) in programs of higher medical education;

2) in military internship;

3) in programs of postgraduate medical education.

4. Training of military medicine specialists shall be carried out in accordance with the state obligatory standards on the levels of education in the field of health care, approved by the order of the Minister of Healthcare of the Republic of Kazakhstan dated July 4, 2022 № ҚР ДСМ-63 (registered in the Register of State Registration of Regulatory Legal Acts under № 28716) (hereinafter – state compulsory standards of education in the field of health care), Rules for the activities of military educational institutions subordinate to the Ministry of Defense of the Republic of Kazakhstan, approved by the order of the Minister of Defense of the Republic of Kazakhstan dated September 18, 2017 № 529 дсп (registered in the Register of state registration of regulatory legal acts under. 15866) and the List of specialties and qualifications for educational programs implemented in military educational institutions subordinate to the Ministry of Defense of the Republic of Kazakhstan, approved by the order of the Minister of Defense of the Republic of Kazakhstan dated August 5, 2020 № 370 дсп (registered in the Register of state registration of regulatory legal acts under №21064).

## **Chapter 2. Training of military medicine specialists of the Armed Forces of the Republic of Kazakhstan**

### **Section 1. Training of military medicine specialists in programs of higher medical education**

5. Training of military medicine specialists under programs of higher medical education shall be carried out in a military educational institution subordinate to the Ministry of Defense of the Republic of Kazakhstan, which implements educational programs of higher education (hereinafter - military institute).

6. Selection of citizens for training of military medicine specialists under higher medical education programs shall be carried out on a competitive basis in accordance with the requirements of the order of the Minister of Defense of the Republic of Kazakhstan from

January 22, 2016 № 35 “On approval of the Rules of admission to training in military educational institutions subordinate to the Ministry of Defense of the Republic of Kazakhstan, implementing educational programs of the appropriate level” (registered in the Register of state registration of regulatory legal acts under № 13268) (hereinafter - the Rules of admission to training).

Citizens who have passed the competitive selection process are enrolled as cadets of the military medical faculty of the military institute.

7. Training of cadets of the military medical faculty under the programs of higher medical education is carried out on the basis of the organization of education in the field of health care (hereinafter - medical university) on a contractual basis.

At the military institute, cadets are trained in military and military-medical disciplines.

8. Cadets enrolled in a military institute shall be trained under educational programs in accordance with the state compulsory standards of education in the field of health care in force at the time of enrollment.

9. Cadets shall be trained on the basis of general education training programs of general secondary education, technical and vocational education, post-secondary education, higher education.

10. Documentation on the organization of the educational process (working curricula, working curricula for disciplines (syllabi), individual curricula, class schedules) shall be developed by the military institute and coordinated with authorized officials of the medical university and shall be revised taking into account changes in the state compulsory standard of education.

11. The military institute shall independently plan the content of education, the way of organizing and conducting the educational process on the basis of credit-based learning technology.

The military institute shall independently distribute the volume of academic credits by semesters (trimesters, quarters). Disciplines shall be implemented during one or several academic periods.

12. Organization of educational, methodical and scientific work, forms and conduct of current, progress control, interim and final attestations in the part related to the teaching of medical disciplines, shall be carried out jointly with the interested structural divisions of the medical university.

13. Term of study shall be determined by the volume of mastered academic credits. When mastering the established volume of academic credits and achieving the expected learning outcomes for obtaining the appropriate degree, the educational program shall be considered fully mastered.

14. The cadets of the military medical faculty after completion of educational programs in accordance with the state compulsory standards of education in the field of health care shall be issued a diploma of a medical university, and after completion of the fifth year of study

shall be issued a diploma of a military institute with the military rank of “lieutenant of medical service”.

15. Expulsion of cadets shall be carried out on the grounds and in accordance with the procedure stipulated by the Charter of the educational organization in accordance with subparagraph 4-1) of paragraph 1 of Article 41 of the Law of the Republic of Kazakhstan "On education" (hereinafter – the Charter of the educational organization).

## **Section 2. Training of military medicine specialists in the military internship**

16. Cadets enrolled in the military institute up to and including the year 2021, continuing their studies in internship programs, and those studying in the sixth year of an educational program of continuing integrated medical education shall be enrolled in the military internship and assigned to the position of a military intern, with whom the head of the military institute shall conclude a new contract for the period of study in the military internship and for ten years of military service after its completion.

17. The selection of citizens for training in a military internship shall be carried out on a competitive basis in accordance with the Rules for Admission to Training.

18. Training of military interns shall be carried out on the basis of a medical university on a contractual basis in accordance with the order of the Minister of Healthcare of the Republic of Kazakhstan from September 18, 2018 № ҚР ДСМ -16 “On approval of the Rules of training of medical personnel in internship” (registered in the Register of state registration of regulatory legal acts under № 17534).

At the military institute, military interns shall be trained in military and military medical disciplines.

19. Servicepersons who continue training under military internship programs shall perform military service in the military position of a variable military intern.

20. Military interns during the period of training according to the state obligatory standard of education in the field of healthcare shall:

- 1) fulfill the individual work plan;
- 2) pass the examinations, interim certification, final certification on relevant disciplines provided by the program;
- 3) submit a detailed report on the work performed.

21. Military interns after completion of training under the military internship programs shall be issued a certificate of internship completion.

22. The expulsion of military interns shall be carried out on the grounds and in accordance with the procedure provided by the Charter of the educational organization.

## **Section 3. Training of military medicine specialists in programs of postgraduate medical education**

23. Training of military medicine specialists under postgraduate medical education programs shall be carried out in a military educational institution subordinate to the Ministry of Defense of the Republic of Kazakhstan, implementing educational programs of postgraduate education (hereinafter - university).

24. Selection of military personnel for training of military medicine specialists shall be carried out on a competitive basis in accordance with the requirements of the Rules of admission to training.

Military personnel who pass the competitive selection process shall be enrolled at the university and appointed as master's or doctoral students or resident military physicians.

25. At the University, resident military doctors, master's students, doctoral students of the Department of Military Medicine shall be trained in military and military-medical disciplines.

26. Training of a resident military doctor, master's student, doctoral student under postgraduate education programs shall be carried out in organizations of higher and (or) postgraduate education in accredited clinics of health education organizations, university hospitals, as well as in national and (or) scientific centers, research institutes accredited as residency bases on a contractual basis.

27. Residency training shall include practical work to acquire appropriate clinical and practical experience at the residency bases corresponding to the levels of medical care in the chosen specialty.

28. Persons who have completed training on the educational program of residency and successfully passed the final certification, shall be awarded the qualification "doctor" in the relevant specialty of residency and shall be issued a certificate of completion of residency.

29. The period of training in residency shall be determined by the volume of mastered academic credits according to the standard curriculum. When the established volume of academic credits is mastered and the expected results of training for awarding the qualification of a doctor in the relevant specialty of residency are achieved, the educational program of residency is considered to be fully mastered according to the requirements for the volume of academic load of programs for medical specialties of residency.

30. Teaching load is measured by the time required for a master student to study an academic discipline, module or the entire educational program of Master's degree and necessary to achieve the established learning outcomes in the educational program of Master's degree in accordance with the state obligatory standards of education in the field of health care.

31. Training of personnel in the Master's degree program shall be carried out on the basis of educational programs of higher education in two directions:

- 1) scientific-pedagogical with the term of study not less than two years;
- 2) profile with the term of study not less than one year.

32. Teaching load is measured by the time required for a doctoral student to study an academic discipline, module or the entire educational program of doctoral studies and

necessary to achieve the established learning outcomes in the educational program of doctoral studies in accordance with the state obligatory standards of education in the field of health care.

Training of personnel in doctoral studies is carried out on the basis of educational programs of master's degree and residency with a study period of not less than three years.
