Article 9. The state control in the field of seed production

1. The state control in the field of seed production shall be carried out by state inspectors on seed production and oriented to ensuring of compliance with the legislation of the Republic of Kazakhstan on seed production, national standards and other regulatory documents in the field of seed production.

2. The state body in the field of seed production shall provide:

1) is excluded by the Law of the Republic of Kazakhstan dated 10.07.2012 № 36-V (shall be enforced upon expiry of ten calendar days after its first official publication);

2) varietal and seed control;

3) control over the activities of certified seed production entities for compliance with their permitting requirements approved by the authorized body;

4) is excluded by the Law of the Republic of Kazakhstan dated 10.07.2012 № 36-V (shall be enforced upon expiry of ten calendar days after its first official publication);

5) control of the state testing of varieties of agricultural plants.

3. Varietal and seed control shall include:

1) control of carrying out the arrangements on production, harvesting, treatment, storage, sale, transportation and use of seeds for compliance with the rules and regulations of seed production in the following periods:

sowing period;

period of vegetation of agricultural plants;

harvest period;

period of seeds filing;

period of storage of seeds;

selling period (verification of prepared for selling and sold seed lots, as well as upon export and import for compliance of their quality with confirming documents).

Control of production of seeds from seed producers, attested in established manner shall include the following stages:

verification of fields, prepared for sowing of seeds – once a year before sowing;

verification of varietal sowings in the period of vegetation – three times a year;

control of approbation and field observations of the varietal and hybrid sowings – once in the period of approbation;

control of cropping (harvest), transportation, treatment (clearance) and storage of seeds, availability of seed warehouses – two times a year for every type of control;

2) control over conducting examination of varietal and sowing qualities of seeds by laboratories for examination of the quality of seeds, their compliance with normative legal acts and documents on standardization in the field of seed production:

two times a year during examination of quality of seeds and also as monitoring at exercise of government procurement of services in examination of quality of seeds;

in cases of presentation of claims to producers of seeds and also variances with the results of researches of seeds on high-quality and sowing qualities given by laboratories on examination of quality of seeds;

3) verification in the period of approbation of the work of approbators, as well as seed producers for compliance with the regulations of paragraph 2 of Article 14 of this Law by them;

4) control over observance by the subjects of seed production of normative legal acts, documents on standardization and other normative documents in the field of seed production.

Article 12. (Is excluded – by the Law of the Republic of Kazakhstan dated 20 December 2004 № 13 (shall be enforced from 1 January 2005). Chapter 4. The production, harvesting, treatment, storage, transportation, sale and use of seeds Article 13. The requirements to production and use of seeds

1. The sale and use of seeds of agricultural plants for sowing (planting) shall be prohibited

:

1) infested by quarantine objects;

2) not passed the testing on sowing qualities in the order established by the present law;

3) received on the basis of genetic engineering (genetically modified).

2. Realization and also use for crops (landing) of the seeds which are not conforming on high-quality and sowing qualities to requirements of the legislation of the Republic of Kazakhstan are forbidden.

2-1. Seeds that do not meet the requirements of national standards and other standardization documents in the field of seed production shall not be allowed for sale and use for sowing (planting).

2-2. Seeds of agricultural plants with the indicators of quality lowered against the established national standards and other documents on standardization in the field of seed production in coordination with authorized body according to subparagraph 13-1) of paragraph 1 of Article 6 of this Law shall be allowed to realization and use for sowing (landing).

3. Excluded by the Law of the Republic of Kazakhstan dated 27.11.2015 № 424-V (shall be enforced after six months after day of its first official publication).

4. Excluded by the Law of the Republic of Kazakhstan dated 27.11.2015 № 424-V (shall be enforced after six months after day of its first official publication).

5. The personal and legal entities which are not certified in the order established by the present Law can carry out production and use of seeds only for characteristic needs without the right of realization.

Article 14 as amended by the Laws of the Republic of Kazakhstan dated 17.07.2009 № 188-IV (the order of enforcement see Article 2); dated 15.07.2011 № 461-IV (shall be enforced from 30.01.2012); dated 29.09.2014 № 239-V (shall be enforced upon expiry of ten calendar days after the date of its first official publication); dated 27.11.2015 № 424-V (shall be enforced after six months after day of its first official publication).

Article 14-1. Requirements, submitted to the activity on conducting approbation of varietal sowings of agricultural plants and expert examination of varietal and sowing qualities of seeds

1. For carrying out of the activity on approbation of varietal sowings of agricultural plants and expert examination of varietal and sowing qualities of seeds, the individuals shall represent copies of documents with notification, confirming:

1) higher or post-secondary education in the following specialties: agronomy, horticulture, soil science and agrochemistry, plants protection and quarantine - for approbators, agronomy, horticulture, processing technology (agriculture), standardization and certification (agriculture) - for seed experts;

2) undergoing special training (courses of approbators – for approbators);

3) details on work or training on probation (no less than two months) in laboratory on the expert examination of the quality of seeds (for seed experts).

2. Approbators and (or) seed experts shall conform to the following requirements:

1) for approbators – existence of:

higher or post-secondary education in the following specialties: agronomy, horticulture, soil science and agrochemistry, plants protection and quarantine;

document on special training (courses of approbators);

2) for seed experts – existence of:

higher or post-secondary education in the following specialties: agronomy, horticulture, processing technology (agriculture), standardization and certification (agriculture);

document on work or training on probation (no less than two months) in laboratory on expert examination of the seed quality and planting material.

Chapter 5. The procedure for determination of varietal and sowing qualities of seeds Article 21. The determination of varietal qualities of seeds of agricultural plants

1. Determination of varietal qualities of seeds of agricultural plants shall be carried out by means of approbation of crops, soil assessment and laboratory varietal tests according to the requirements established by normative legal acts, documents on standardization, and shall be obligatory for the certified producers of seeds.

2. Varietal sowings of agricultural plants, the seeds from which are intended for selling or use by the subjects of seed production for own seed sowings shall be subject to compulsory approbation.

3. Original and elite seeds of grades of the agricultural plants included in the State register of the selection achievements recommended for use in the Republic of Kazakhstan are subject to ground assessment.

4. The elite seeds and seeds of the first reproduction of grades of the agricultural plants included in the State register of the selection achievements recommended for use in the

Republic of Kazakhstan intended for the subsequent realization are subject to bench high-quality experiments.

Footnote. Article 21 as amended by the Law of the Republic of Kazakhstan dated 11.12.2009 № 229-IV (the order of enforcement see Article 2); dated 05.10.2018 № 184-IV (shall be enforced upon expiry of six months after its first official publication).

Article 22. The determination of sowing qualities of seeds

1. Determination of sowing qualities of the seeds which are subject to realization and use for crops is carried out by means of sample drawing of seeds and the subsequent their analysis in laboratories on examination of quality of the seeds accredited in the order established by the Law of the Republic of Kazakhstan “On accreditation in the field of compliance assessment”.

2. Selection of samples from seed lots, being subject to selling shall be carried out by the state inspectors on seed production of local executive body of oblast, city of republican significance and the capital with the participation of a representative of a seed producer.

3. Sample drawing from batches of the seeds intended only for crops is made by seed experts in the application of producers of seeds and (or) producers of seeds (their representatives) who had the corresponding training in laboratories on examination of quality of seeds.
